SUMMARY Detail-oriented QA Engineer with a background in account analysis and production coordination. Practiced in inventory analysis with a knack for organization. A problem-solver, with a collaborative approach as a team player and manager.

KEY SKILLS

- Test Planning, including black, white and exploratory
- First line Help Desk resolution
- Relationship Building
- Excellent collaborator
- Database Administration
- Experience with: Windows, Android
- Office and Adobe
- Problem solving
- Excellent communication skills
- Report building and analysis

PROJECTS **End of Course Projects, Web and Mobile for HackerU**
A web and mobile app testing project was executed within an agile-scrum framework. Responsibilities included test documentation (STP, STD, STR) and testing with Postman, DevTools, and Jira. Collaboration ensured effective strategies, with presentations facilitating conflict resolution. The project concluded with a successful demo, showcasing teamwork and the product quality.

EXPERIENCE **Account Analyst and Production Coordinator - Citybook Services** **2012-2024**
Quality Issue Resolution: Identified and resolved product discrepancies, ensuring deliverables met quality standards—experience directly applicable to pinpointing and addressing software bugs or process inconsistencies.

Technical Acumen: Utilized a range of client applications and spearheaded SaaS integration to reorganize internal systems, demonstrating a strong ability to work with technical tools and platforms common in QA environments. The internal system reorganization reduced the average file time by 1 hour.

Team & Workflow Management: Directed team goals and workflow, ensuring that operational processes were streamlined and quality benchmarks were met consistently.

Client-Focused Communication: Delivered weekly presentations and feedback to management and clients, showcasing clear communication skills essential for reporting defects, suggesting improvements, and collaborating with development teams.

Inventory Management and Administrative Assistant - Silver Jewellery International **2009**
Process Improvement & Control: Oversaw daily operations, including streamlining inventory tracking and order fulfillment, ensuring processes were efficient and error-free; parallels the systematic approach required in QA testing and process optimization.

Organizational Excellence: Managed all office tasks with a high level of detail and accuracy, reinforcing a disciplined work ethic and the precision necessary for effective quality assurance documentation and analysis.

Student Information Desk Representative - Bay Path College **2004-2006**
Attention to Detail: Prepared events and designed newsletters, which required meticulous planning and error-free execution—skills that translate well into thorough test planning and documentation in QA.

Effective Interoffice Communication: Maintained clear internal communications, ensuring that key information was accurately shared across departments—a vital component in coordinating cross-functional QA efforts.

EDUCATION **Quality Assurance Training - HackerU (2024)**
Focused on QA fundamentals, networking models, and web technologies (HTML, CSS, SQL), with hands-on Agile project experience. Active participation in team-based projects reinforced collaborative skills.

Associate of the Arts - Bay Path College (2004-2006)
Two-year college degree in the liberal arts.
